Power network upgrade Cobblebank and Melton November 2025

We're upgrading the electricity network to meet the growing needs of the community.

Works

In November, new power poles and lines will be installed along **Ferris Road, between High Street in Melton and Bridge Road in Cobblebank and on the Western Freeway outbound entry and exit ramp** (see map overleaf).

When

These works are currently scheduled to take place between **7am to 6pm, Monday to Friday from Tuesday 11 November until early December 2025.**

Weekend and night work

Some works will take place on weekends or overnight to reduce disruption to traffic.

Traffic changes

- Up to **five overnight closures between 8pm and 5am** will be required on the Western Freeway outbound entry and exit ramps, with clearly signed detours in place.
- Lane closures may also occur at times along Ferris Road during works.
- Access for local traffic, cyclists and pedestrians will be maintained at all times, with signs in place to guide everyone safely.

What to expect

- Where possible, we complete works without interrupting power. However, to allow our crews to work safely and efficiently, some customers may experience a temporary planned power outage.
- You will receive a separate notification with details of any planned outage, including the date and duration.
- You may notice some noise at times while these works are carried out.
- Some tree trimming and removal will be required near the Western Freeway.
- On completion of these works, any disturbed areas will be reinstated.
